When it comes to aging we want our skin to be forgetful. You see, the DNA of the skin cells remember old scars, the creation of wrinkles, and pigmentation. That's why without the correct solution your skin will stay the same, or appears to age hideously every day of your life.

This off label layered peel uses metabolic retinol derivatives, guaranteeing that we get to the appropriate layer of the skin... to treat the problem where it starts. When the cell turnover cycle is put on the fast track, skin cells come up faster, fresher, and well... quite forgetful. History will not repeat itself.

Indications:

Lines/Wrinkles · Melasma/Hyperpigmentation
Uneven Skin Tone · Pre/Post Plastic Surgery · Mild Acne
Acne Scarring · Actinic Keratosis

*This peel requires a prep for 2-6 weeks depending on ethnicity. Our intention with the prep is to remove excess oil (to maximize penetration), stimulate blood flow and get going already! We are exposing the skin to the same ingredients that will be used in the peel to make sure that the low doses are tolerated. This must be done before we slap on the peel at... drum roll... 8 times the strength.

The effect of the preps varies, but redness and peeling are to be expected and are like going to the gym after you haven't been for awhile... it might hurt.
